APPENDIX A – PLAN TYPES AND CATEGORIES

APPENDIX B – DIRECTIVE AND INDICATIVE PLANS

## **1.0 INTRODUCTION**

This Part 6 – Scope of Services Package Plans contains Plans created during the previous bridge design, the adjacent roadway approach contracts, and drawings created specifically for this Contract. Applicable CADD files in electronic format on CD-ROMs (Compact Disc – Read Only Memory) are included in the Reference Documents.

The Scope of Services Package Plan types contained herein are categorized as either Directive Plans or Indicative Plans. Directive Plans are those Plans that depict required elements and components of the Project within specifically defined parameters. The Design-Builder has limited or no latitude to adjust components, details, or limits shown on Directive Plans. Examples of Directive Plans include the following:

- A) Basic Project Configuration Plans that depict the Basic Project Configuration within the limits defined in the Contract, including but not limited to roadway geometrics, lane configuration requirements, and clearance envelopes;
- B) Final Department-developed plans signed and sealed by a licensed engineer that represent the final design of a self-contained component of the overall Project, such as the roadway approaches. The Design-Builder has no responsibility for the design or construction of the component except for the interface between the Design-Builder's Work and the adjacent Project component or element, unless otherwise specified in the Contract Documents; and
- C) Right-of-Way (ROW) plans that depict the limits of ROW or easements obtained or to be obtained by the Department.

Indicative Plans are those Plans or portions of Plans that provide informational details that may be of use to the Design-Builder in determining possible design and construction solutions. The Design-Builder is not required to incorporate Indicative Plan details, components, and/or limits into his Work unless otherwise specified in the Contract Documents. Examples of Directive Plans include the following:

- A) Original Bridge Design Plans (Contract #25-073-02) for single-rib concrete arch bridge type.

## **2.0 PLAN TYPES AND CATEGORIES**

The plan types and categories are shown in Appendix A to this Part 6 – Scope of Services Package Plans.

## **3.0 DIRECTIVE PLANS**

The directive plans for this Project are contained in Appendix B to this Part 6 – Scope of Services Package Plans.

## **4.0 INDICATIVE PLANS**

The indicative plans for the Project are contained in Appendix B to this Part 6 – Scope of Services Package Plans.
